

Muhammad Danial Siddiqui

AI ENGINEER

+923368273918 ◇ muhammaddanialsiddiqui@gmail.com ◇ Karachi, Sindh, Pakistan ◇ [LinkedIn](#)

SUMMARY

AI Developer with 6+ years of experience building end-to-end AI solutions and TOP RATED FREELANCER, specializing in Generative AI, Large Language Models (LLMs), Agentic AI, and NLP. Skilled in designing and deploying autonomous, goal-driven AI agents that streamline workflows, enhance decision-making, and scale business operations. Proven expertise in AI automation, real-time analytics, and cloud-based deployment (AWS, Azure), delivering scalable, production-ready AI systems across industries. Adept at transforming complex business challenges into intelligent, data-driven solutions that drive measurable growth and efficiency.

EXPERIENCE

Lead AI Engineer Oct '25 — Present
OfficeHub Australia

Multi Agent System.

Lead AI Engineer Jun '25 — Sep '25
CIPHERTRONIX Karachi, Pakistan

Project: Esential (Contractual)

- Building a PRE-Fraud Detection System for Banking Industry using the Advance AI Systems and RLHF techniques.
- Around 500TPS (Transactions Per Second) management and Predicting the Fraud.

Senior AI Engineer Oct '24 — Nov '25
OneDigit United States

- Led AI development, deploying 3+ LLM-powered systems that improved process automation by 40%.
- Integrated NLP & computer vision into core products, boosting client engagement by 35%.
- Reduced model inference time by 50% through optimized pipelines and cloud scaling.
- Delivered AI solutions across 5+ industries, accelerating time-to-market by 25%.

AI Engineer Jul '23 — Oct '24
Eaisoft United Kingdom

Project: AiCarz

- Built recommendation engine increasing user engagement by 30%.
- Developed backend APIs enabling 99.9% uptime for ML model deployment.
- Designed cognitive algorithms improving data retrieval speed by 45%.
- Optimized feed-stream system, boosting content relevance by 40%.

Machine Learning Engineer Mar '21 — Apr '22
Plexus Consultancy Dublin, Ireland

- Led the end-to-end Tips Room project, from research to execution, ensuring on-time delivery.
- Researched and implemented optimal ML techniques to create innovative, high-impact solutions.
- Managed and coordinated cross-functional teams, improving workflow efficiency by 30%.
- Supervised and mentored a team of ML engineers and data scientists, enhancing project quality.
- Drove successful integration of ML models into production, directly contributing to project success.

Data Scientist Jan '20 — Dec '20
Lv.1 Karachi, Pakistan

8th Loop Ventures Project: Convolytica Jan '22 - Dec '22 Karachi, Pakistan

- Developed microservice APIs, improving system scalability and integration by 40%.
- Fine-tuned GPT-3 models, increasing NLP accuracy and relevance by 25%.
- Engineered AWS-based cloud solutions, reducing deployment time by 50%.
- Built Roman Urdu NLP engine and chatbot, enabling real-time bilingual communication.
- Junior Data Scientist
- Built NER models with SpaCy & Neo4j, improving data extraction accuracy by 35%.
- Developed language detection, emotion, and sentiment analysis models for multi-domain use.
- Leveraged graph databases to enhance knowledge retrieval speed by 40%.

EDUCATION

BS in Computer Science, Virtual University of Pakistan Aug '25 — Present
Karachi, Pakistan

CERTIFICATIONS

MTA 98-381 Introduction to Python Programming, Microsoft Jan '20

PROJECTS

Smart Traffic Management System, Intel Edge AI Link

- Designed and deployed a computer vision-powered traffic control system, improving signal efficiency and real-time vehicle detection.
- Designed the system architecture to ensure seamless communication between edge devices and the cloud for optimized traffic control.

MonteCarlo Simulation Analysis

- Designed and executed simulations to model various scenarios, integrating results into actionable insights and visualizations.
- Enhanced accuracy of forecasts by 25% and improved the understanding of potential risks and outcomes.

AI Calling Agent Automation

- Developed an AI-powered voice communication system using VAPI, enabling real-time speech recognition, NLP-driven responses, and CRM integration to automate customer interactions and reduce operational costs.

RAG SYSTEM

- Data extraction pipeline for a RAG solution, delivering high-accuracy results through advanced AI and data processing techniques, praised for clear communication and seamless teamwork.

SKILLS

Programming Python, Fastapi, Flask, Django, Streamlit

Web Development Html, CSS, Bootstrap

Data Science Numpy, Pandas, Matplotlib, Seaborn, Tensorflow, PyTorch, Keras, NLP, Open-CV, Spacy, Q-Learning, Recommendation Engine, OpenAI

Cloud Computing AWS, GCP, AWS Elastic Beanstalk, EC2, Amazon CloudWatch, CI/CD, Dockers, Graphana, Prometheus

Databases MongoDB, GraphDB, Neo4j, SQL

Agentic AI AgentScope, Langgraph, Langchain, Ollama, llama.cpp, OpenAI Agent SDK, Open AI API, RAG, CAG

Languages Urdu, English
